

1. Website:

- Instagram (MLBB page)

2. Analyzed Layout:

- Sidebar (Left Panel) – Navigation menu with options like Home, Explore, Reels, Messages, and Profile.
- Profile Section (Top) – Displays the profile picture, username, bio, follower count, and external links.
- Story Highlights (Below Profile) – Circular icons for quick-access features like Comics, MGL Guide, MPL, etc.
- Posts Section (Main Content Area) – Includes tabs for Posts, Reels, and Tagged Photos, with a grid layout for images and videos.
- Footer (Bottom of Page) – Contains links to Meta's policies, help pages, and other resources.

3. Tool:

- I used Canva

4. My Analysis:

- When analyzing the layout of the Instagram profile page, I started by identifying the major sections that structure the webpage. The sidebar on the left serves as the main navigation, allowing users to switch between different areas of the platform. The profile section at the top contains essential details such as the profile picture, username, bio, and external links, making it a key focal point for visitors. Below that, the story highlights provide quick access to important categories, represented as circular icons.
- Breaking the page further, the main content area is divided into three primary tabs: Posts, Reels, and Tagged Photos, each displaying media in a grid format. Finally, the footer contains helpful links related to Instagram's policies and additional resources. By visualizing the page as separate blocks, it becomes easier to understand the structure and flow, which is essential for both design planning and coding. This method ensures that each section is clearly defined, making the development process more manageable and scalable.
